

# 4.NF.a.1 Equivalent Fractions

I can show & explain why two fractions are equivalent even though the numerator & denominators are different.

## LINGO

### equivalent fractions

Fractions that name the same amount

## HOW

## PRACTICE

Look at the shaded areas of the pictures below, then circle the ones that are equal.

Look at the fraction on the left. Color the boxes on the right so they are each equal to the one on the left.

$$\frac{1}{2} = \frac{2}{4} = \frac{4}{8}$$

These are all equivalent fractions

These 2 rectangles are the same size.

This one is divided into 10 pieces

This one is divided into 5 pieces

What do you notice about the yellow shaded parts?

$$\frac{2}{10}$$

$$\frac{1}{5}$$
